Education

Sant Gadge Baba Amravati University, Maharashtra

Sep 2025 – June 2028 (Exp.)

BE in IT (Direct Second Year) – CGPA: 8.0/10 (Sem 3)

Shegaon, MH

Government Polytechnic Arvi, Wardha

Sep 2022 – June 2025

Diploma in Computer Engineering – 85.8%

Wardha, MH

Projects

EduAI – AI Educational Platform | *Next.js, Express, PostgreSQL, Firebase* [GitHub](#) | [Live](#)

- Developed an AI Course Wizard using Gemini and OpenAI, cutting course creation time by **90%**; gamification (streaks, points, heatmaps) boosted student retention by **60%**.
- Built multi-provider AI engine (Gemini, OpenAI, OpenRouter) with automatic failover for **100%** uptime; added community forum with threaded discussions and leaderboards.
- Deployed full-stack with Next.js, Express, PostgreSQL, and Firebase Auth for role-based access and real-time analytics.

SmartHire – AI Recruitment Platform | *React, Express, PostgreSQL, Groq AI* [GitHub](#) | [Live](#)

- Implemented an AI skill-matching engine using Groq LLaMA 3.3-70B across 4 evaluation dimensions, cutting resume screening time by **70%** and manual matching by **60%**.
- Engineered a drag-and-drop Kanban hiring pipeline with unified job search via RapidAPI, improving candidate tracking efficiency by **50%**.
- Deployed on Vercel/Render with Neon PostgreSQL and Drizzle ORM, achieving sub-**200ms** API response times.

ApexTask – Project Management | *React, Node.js, PostgreSQL, Firebase* [GitHub](#) | [Live](#)

- Built a Kanban-style tool with drag-and-drop tasks, real-time notifications, and Firebase Auth, cutting project setup time by **40%** and improving team response by **50%**.
- Used Zustand for state management and optimistic UI, plus role-based workspace access that cut admin overhead by **30%**.
- Optimized backend with Prisma and Neon PostgreSQL, achieving under **150ms** average query response times.

Experience

FlyRank AI

Present

Backend AI Engineering Intern (Remote)

- Building scalable backend systems and integrating machine learning models into production applications.
- Optimizing API performance and designing event-driven architectures for AI-powered features with high reliability and low latency.
- Contributing to end-to-end AI service development, from prototype to deployment, with focus on clean code and monitoring.

CODSOFT

June – July 2026

Web Development Intern (Remote)

- Developed full-stack web applications using React.js and Node.js, delivering projects within tight deadlines and client requirements.
- Followed industry best practices including Git version control, code reviews, and Agile sprint cycles for quality deliverables.
- Built RESTful APIs and integrated third-party services using clean, maintainable JavaScript/TypeScript.

Technical Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript

Frontend: React, Next.js, Tailwind CSS, Vite, Shadcn UI

Backend: Node.js, Express, REST APIs, JWT, Firebase, OAuth

DB & ORM: PostgreSQL, MySQL, MongoDB, Prisma, Drizzle

DevOps & Cloud: Docker, Git, Vercel, Render, AWS (Cloud Foundations), OpenShift, Linux, CI/CD

Certifications

AWS: Cloud Foundations & Architecting (March 2026) — **Red Hat:** OpenShift & Linux (March 2026)
